

## Cattron Releases the CANplus™ CP750-E – an Enhanced Version of the Long-Lasting CP750

*September 19, 2022*

Cattron is adding to its CANplus product line with the introduction of the [CP750-E](#), an enhanced version of the CP750 with a variety of premium features. The digital panel is used across oil and gas, agriculture, and water management applications for engines and pumps within the rental equipment market.

The CP750-E offers manual and autostart operations and complete engine control, monitoring, and protection for electronically and mechanically governed engines. Powered by CANplus RT software, the panel provides simple, one-touch, multi-level PIN-based access, an intuitive event manager, Tier 4F and Euro Stage V compliance and diagnostics through [RemotelQ™ QR-Assist](#).

Features of the CP750-E include:

- Large sunlight viewable color display
- CANbus interface that supports SAE J1939 message
- Easy configurations through USB port
- CANplus™ Control advanced throttling and control capabilities
- Integrated emergency stop, AUXIO and Modbus or a combination of all three

“The CP750-E builds on the success of our existing CP750 and adds in enhanced features our customers require.”, says Brian Fette, Vice President of Product Management. “It’s a unique combination of what worked for the existing product but incorporates a modern, future-capable technology platform.”
