

Tasverii™

SOFTWARE FOR RAIL-INSIGHT EDITION

WEB-BASED MONITORING & ANALYTICS SOFTWARE

HIGHLIGHTS

Increase productivity, safety and profitability with Tasverii™ monitoring and analytics software. Using a combination of reporting, alerts, and tracking features, Tasverii enables you to monitor trends in yard operations, oversee asset health, and take proactive measures to keep your assets and personnel safe and productive.

From maintenance departments and yard managers to executives and operation owners, Tasverii provides virtual information when and where you need it.

Tasverii with built-in technical support and alerting services contacts your team to with early notification of equipment issues and provides complete troubleshooting and technical support via a 24/7 helpdesk.

FEATURES

ACCESSIBILITY

Monitor data and alerts sent over the secured website, which can provide up-to-date detailed reports on operational usage. Directly connect to locomotives and view live output from the virtual dashboard.

PRODUCTIVITY

Analyze equipment usage and misuse before damage occurs with operation reports. Analyze operations metrics over time to identify areas needing improvement.

SAFETY

Monitor operator behavior and equipment settings and send alerts to on-site supervisors for quick, technical support to ensure safe operations.

ASSET UPTIME

Effectively manage maintenance strategies and maximize performance with minimal operating risk while keeping your assets running at maximum capacity. Alerts are sent when problems are identified.

TASVERII™ SOFTWARE FEATURES

FEATURE	SPECIFICATION
Reporting	Reports are designed to provide information to all groups in charge of ensuring yard operations run smoothly including maintenance, transportation, and engineering groups. Reports include information on operator productivity, wheel slip, speed violations, communications health, Operator Control Unit (OCU) metrics, and emergency brake incidents.
User Customization	Tasverii utilizes user roles to provide access to yards and reports based on the customizable permissions. This flexibility creates a dynamic and efficient user experience by only providing visibility into the tools each user needs.
Alerts	Event-based alerts are sent to users directly and tracked on the web application.
Locomotive Tracking	Tasverii is integrated with Google Maps and has interactive map functionality for a variety of different reports. Locomotive location, operating status and detailed metrics are all visible in the locomotive tracker.
Yard Overview Home Page	One click is all it takes for yard managers to get an instant snapshot of conditions in the yard. Upon logging into Tasverii™ software, users are taken to the home page where they are presented with reports and maps showing the most relevant information in one place.
