

2020 ASLRRA Annual Convention

Location: Grapevine, TX

Date: Event Postponed

Cattron Booth: 519

ABOUT ASLRRA (American Short Line and Regional Railroad Association)

Founded in 1913, ASLRRA proudly represents the entrepreneurial owners and operators of short line and regional railroads throughout North America. These approximately 600 small businesses play a vital role in the hub-and-spoke transportation network, often providing the first-mile/last-mile connection between farmers and manufacturers and the ultimate consumer.

FEATURED SOLUTIONS:

Accuspeed™ and Beltpack™ | Accuspeed and Beltpack are comprehensive locomotive speed control systems that enable operators to safely control the locomotive via a wireless remote control. Equipped with Cattron's patented dynamic speed control and an abundance of safety features, these systems are used by Class I railroads throughout North America.

OCU-III | Cattron's feature-rich OCU-III, used with Accuspeed, Beltpack and Transport locomotive remote control systems, includes an embedded GNSS location, a patented method for pushing OCU positional data to the RCL system, Bluetooth® link to the internal archive record and a Wi-Fi port to accommodate future expansion.

Transport™ | The Transport product line includes three different locomotive remote control systems to support the needs of short line, regional railroads and plant rail operations. Transport products offer variable or single speed control options, safety focused features and can be installed as a fixed mount or a quick connect solution.
