

RELIABLE CONCRETE PUMPING REMOTE CONTROL

Concrete Pump Supply Choose Cattron

Concrete Pump Supply has supported the North American concrete pump industry for more than 30 years, serving as a trusted one-stop shop for concrete pump parts and systems. As customer needs increasingly shifted toward safer, more flexible, and more efficient concrete pump control, the company sought a reliable and cost-effective radio remote control solution that would deliver essential pump functionality while maintaining a dependable operating range.

The Challenge

Concrete Pump Supply required a reliable wireless control system that could support the everyday operations of concrete line pumps used in commercial and residential projects. Operators often work in challenging environments where maintaining visibility and direct access to the pump is difficult. These include pumping behind buildings, around multiple structures, inside buildings with several walls or rooms, or even on second floors. The company required a solution that could:

- Provide basic concrete pump control functions
- Deliver a reliable range for small line pump jobs
- Offer flexibility for maneuvering hose lines into difficult-to-reach areas
- Remain cost-effective and simple to install
- Fit a wide variety of pump models without complex customization

Reliable Remote Control for Concrete Pumping

The Solution: Tyro™ Pump Boss™ Musca Package

To meet these needs, Concrete Pump Supply selected the Tyro Pump Boss Musca Package, which pairs a Musca 2S transmitter with an Aquarius 2S receiver to deliver an integrated radio remote control system designed for concrete pump applications. The Pump Boss Musca Package offers rugged, user-friendly wireless control that enhances operator mobility and safety. Its capability to support basic concrete pump control functions makes it ideal for concrete line pump operations in commercial and residential settings.

The system's flexibility allows operators to position and guide the hose more effectively in confined or obstructed areas, improving precision in concrete placement. The solution is easy to install, program, and configure, enabling it to fit a wide range of pump models without extensive modification.

Results

By implementing the Tyro Pump Boss Musca Package system, Concrete Pump Supply successfully delivered a concrete pump control solution that meets the practical demands of everyday job sites while remaining affordable and reliable. The company now provides customers with a radio remote control for concrete pumps that:

- Improves safety by allowing operators to work at a distance
- Enhances efficiency in tight or obstructed work areas
- Maintains dependable range for typical small line pump applications
- Simplifies installation and setup across pump types

This strong combination of performance, durability, and ease of use reinforces Concrete Pump Supply's commitment to delivering the right tools and technologies for concrete line pump professionals across North America.
